

the
Sentinel
crime deterrent unit

under lock & KEY

Utilising an IP66 certified enclosure, the SENTINEL ensures a weatherproof, secure housing that keeps its components operating the way they should. Realising that security is its promise, it also engages a sturdy lock and key mechanism to prevent easy access and attempted vandalism.

Rest easy that your environment is now being monitored by a highly functional anti-crime device whilst itself being under lock and key...

lighting the way **in** preventative security

Sporting a high power halogen spotlight, the SENTINEL acts to light up any area configured within the confines of the area of displacement according to the dispersion area of the chosen light unit utilised. As per normal instinct, any human activity of the unwanted kind gets brought to light so to speak, and deters any kind of illegal or immoral perpetration. Preventative security. We'll light the way.

we'll be watching

We use cameras specific to our customers requirements. Budget and applications purposes dictate the ability of cameras installed and can be upgraded at any time whenever required or simply because the constant evolution of technology has released something truly exceptional!

The fact that our SENTINEL clients are NOT tied into a system that will become obsolete is quite the variance compared to other industry level electronics that are available for purchase. Acquiring our technology knowing that you are future proofed indicates that we, as a company, are tremendously driven by customer service and you can have absolute peace of mind regarding your investments.

With proper streaming ability and remote flexibility, the vigilance of our eye guard is without question and will ALWAYS keep remembering...

dvr.evo 4/8/16.the evolution of monitoring.

wi-fi + 3G = access to anything from anywhere.

communications

Heighten security efficiency with a Gateway that combines the performance and reach of Telstra's Next G® network with advanced WiFi and Ethernet connectivity. Connect your monitor to the Next G® network and set up a secure monitoring network for up to 16 WiFi devices as well as 4 wired devices and 2 USB printers or mass storage devices without fixed line limitations. The user-friendly Ultimate® Gateway integrates 4 Ethernet ports, 300Mbps Wireless N WiFi, 4 internal antennas and 2 USB 2.0 ports for versatile online access wherever coverage exists.

Anywhere, anytime connectivity

Ideal for mobile businesses and temporary office setups without access to ADSL, cable or fibre, the Ultimate® Gateway establishes a high-speed 42Mbps mobile broadband Internet connection wherever there is Next G® coverage and power available.

Instant wireless. 300Mbps

Create a superfast 300Mbps WiFi network from any location and share the single Next G® mobile broadband connection with 16 wireless devices of your choice. The cost-effective Ultimate® Gateway connects multiple devices to the one mobile broadband connection to save time and money.

watch closely
utilising the sentinel.

application.

If it needs watching, if it needs monitoring, if it needs to be recorded and you need to access it real time or otherwise, with alerts or without, then SENTINEL will be right up your alley. An affordable, real world, tested solution that works every time you require it to. A device that is easily re-located and re-utilised wherever and whenever you like. Coupled with our non nonsense warranties, it would be a poor choice to buy anything else.
