

BC4 Automation Controller

The BitWise Controls BC4 controller is perfect for basic single-room installations, or as an expansion controller for BC1 or BC2 based projects

- Supports two-way interaction with one serial or networked device
- Communicates with every BitWise user interface and controller on your network
- On-board relays and signal sensing ports allow interaction with mechanical devices
- Built-in macro storage

Connectivity	
Ethernet	10 Base-T
Device Control	
IR Ports	4 (plus built-in blaster)
RS232	1 (Terminal Strip)
Relays	2 (SPDT)
Signal Sense	2 (GPIO)
Network Devices	1 External Device
Dimensions	
H x W x D	1 1/4" x 4 5/8" x 5 3/8"
H x W x D (packaging)	4" x 12" x 9"
Power	
External	12VDC - 0.5A (adapter included)
